

Sourcebook of Criminal Justice Statistics in the Commonwealth

2011

Prepared by the
Kentucky Statistical Analysis Center

Foreword

Dear Policymaker:

It is with great pride that the Kentucky Justice and Public Safety Cabinet releases the 2011 edition of the *Sourcebook of Criminal Justice Statistics in the Commonwealth*. As the second largest agency in state government, the Justice and Public Safety Cabinet continuously works to improve public safety and the quality of life for the citizens of Kentucky. By providing comprehensive information from all components of the criminal justice system, the Sourcebook continues to encourage data-driven decision making to aid effective criminal justice policy development in the 21st century. This report reflects a unique partnership among criminal justice agencies whose collaborative efforts permit the presentation of a broad overview of the system. As the data infrastructure in Kentucky's criminal justice system continues to improve, we believe the *Sourcebook* will become an even more effective tool for meeting critical planning needs and addressing statewide criminal justice policy issues.

In addition to valuable information on crime, arrest, prosecution, correction, and juvenile justice system trends, the tenth edition of the *Sourcebook* highlights selected crime categories that are currently of interest in the criminal justice system. These special topics include drug related offenses with a particular focus on methamphetamine and prescription drugs, driving under the influence (DUI) offenses, sex offenses, and domestic violence. Shared information across agencies presented here allows for a greater understanding of how these crimes are affecting the state.

The following report is organized in a manner that follows traditional movement across the system, from arrest to prosecution to corrections, and should thus be viewed as a systemic integration of data sharing and analyses. I encourage you to use this report as a convenient and accessible resource for criminal justice data. Please contact the Cabinet if you have any questions or need further information. It is my goal, and that of the Cabinet, for the 2011 Sourcebook to serve as a vital resource for policymakers, state officials, and the citizens of Kentucky. On behalf of the Kentucky Justice and Public Safety Cabinet, I would like to express appreciation to the criminal justice agency personnel and faculty who contributed time and energy to enable the publication of the 2011 edition of the *Sourcebook of Criminal Justice Statistics in the Commonwealth*.

J. Michael Brown, Secretary
Kentucky Justice and Public Safety Cabinet

Acknowledgements

Publication of the 2011 edition of the *Sourcebook of Criminal Justice Statistics in the Commonwealth* was made possible through the commitment and participation of criminal justice and other governmental agency representatives. The Justice and Public Safety Cabinet would like to express its sincere gratitude and appreciation to the following organizations and agency representatives who contributed to this important data collection project.

Administrative Office of the Courts

Erin Mosely, Statistician
Records/Research and Statistics
Department of Court Services

Jason Cloyd, Manager
Records/Research and Statistics
Department of Court Services

Attorney General's Office

Tonjua Casey, Internal Policy Analyst
Department of Criminal Investigations

Cabinet for Health and Family Services

Jennifer Withrow, Program Administrator
Family Violence Prevention Branch
Department of Community Based Services
Division of Protection and Permanency

Dave Hopkins, Health Service System Manager
Kentucky All Schedule Prescription Electronic Reporting

Crime Victims Compensation Board

Lindsay Crawford, Policy Advisor
Crime Victims Compensation Board

Department of Corrections

Melissa Chandler, Internal Policy Analyst IV
Division of Parole and Victim Services

Cedric Coleman, Programmer Analyst III
Department of Corrections

Ruth Edwards, Internal Policy Analyst
Adult Institutions/Office of Research and Grants

Kristin Smith, Program Administrator
Office of Victim Services

Department of Juvenile Justice

Chad Burkhead, Information Systems Supervisor
Information Systems Branch

Department of Public Advocacy

Scott Richard, CIO/Information
Systems Manager
Law Operations

Kentucky Justice and Public Safety Cabinet

Tanya Dickinson, Branch Manager
Grants Management Branch

Kentucky Rescue and Restore

Marissa Castellanos, Human Trafficking Program Manager
Case Management and Family Support Department
Catholic Charities of Louisville

Kentucky State Police

Brandon Cobb, Uniform Crime Reporting Section
Criminal Identification and Records Branch

Limitations of Current Data and Information Systems

As you review the information contained in the *Sourcebook*, it is important to keep in mind that data have been drawn from a number of state level criminal justice data collection systems in an attempt to provide a snapshot of crime trends in the Commonwealth. A detailed description of the existing systems can be found in Appendix A. Until these systems are fully integrated into a statewide Unified Criminal Justice Information System, there will remain limitations in the data available for analysis. These and other limitations are delineated below.

- As a result of the variation across agencies, it is currently not possible to publish a fully integrated criminal justice system report or to perform systemic trend analyses. This report is intended to provide individual snapshots of the key components of the justice system (law enforcement, courts, corrections, prosecution, and defense), and to draw general conclusions regarding system trends where possible.
- Data collection systems of criminal justice agencies were established independently for in-house data management purposes and not for planning or policy evaluation.
- There are currently no standardized formats for defining data elements or counting criminal justice events. Agencies vary according to what is being counted (e.g., charges, cases, or individuals).
- While efforts are ongoing to unify the codes used to define each offense presented in the *Sourcebook*, differences still exist among agencies. For example, the Kentucky Administrative Office of the Courts defines robbery offenses using a different set of offense codes than the Kentucky Department of Corrections. Therefore, readers are cautioned not to compare data directly across agencies. This report is expected to improve over time as reporting practices become more consistent. A list of the offense codes used to derive each table or figure can be provided upon request.
- Starting in 2005, in an attempt to further unify the data, all data were requested to be reported on a calendar year basis, with the exception of fiscal data. This particular change in the reporting parameters will affect the user's ability to compare data across previous editions of the *Sourcebook*.
- Each year, adaptations are made to the *Sourcebook* in an effort to improve the quality of the information provided. The methods of reporting and the process of compiling this annual report are constantly evolving with the end goal to put forth the most accurate data available. As such, the user's ability to compare data published in the 2011 edition of the *Sourcebook* with previously published editions will be affected.
- Calculations, such as percent change, rate per population, etc. were prepared by the Kentucky Statistical Analysis Center, not the agency providing the original data unless otherwise noted.

- Several agencies have provided updated data for years prior to 2011. As a result, the data in the 2011 *Sourcebook* may be different from that which is found in earlier editions of the *Sourcebook*. Where possible, the updated data has been included in order to provide the most accurate data available. Data updates may occur because of changes in the information systems, changes to the criminal code, and/or retroactive data updates. If such a change has occurred, where possible, the data has been recalculated for all years presented in the table or figure.
- Kentucky currently uses the FBI's Summary Uniform Crime Reporting Program (UCR) and National Incident Based Reporting System (NIBRS) to collect data. The UCR is a nationwide, cooperative statistical effort of more than 18,000 city, county, college and university, state, tribal and federal agencies voluntarily reporting data on crimes. These agencies represent 99.3% of the nation's total population. The NIBRS includes information on Group A and Group B offenses. Group A crimes consist of more serious offenses such as Homicide Robbery, and Arson, while Group B crimes consist of less severe offenses.
- In an effort to improve the quality of the Kentucky State Police's annual *Crime in Kentucky* reports, several adaptations were made in 1998 to data reporting that have continued through 2011. These changes, which include transitioning from Part I and Part II offenses to Group A and Group B crimes, are in accordance with UCR guidelines. These changes will affect the user's ability to compare data published in the 2011 report with previously published data.
- The following disclaimer has been issued by the Kentucky Administrative Office of the Courts and applies to all data within the *Sourcebook* that is attributed to that agency: "Information received from COURTNET is subject to change(s), reprogramming, modification(s) of format and availability at the direction of the Administrative Office of the Courts (AOC), and may not at any particular moment reflect the true status of court cases due to ordinary limitation(s), delay(s) or error(s) in the system's operation. The AOC disclaims any warranties as to the validity of the information obtained from COURTNET. The recipient is solely responsible for verifying information received from COURTNET through the cross-referencing of official court records. The AOC shall not be liable to the recipient, or to any third party using the system or information obtained therefrom, for any damages whatsoever arising out of the use of COURTNET." Detailed limitations pertaining to Administrative Office of the Courts data is provided in Appendix D.
- The U.S. Census Bureau collects population and demographic data on a ten-year cycle. In the years between the decennial census, population estimates are created based on continuously collected data. As a result, information which makes use of U.S. Census Bureau data for the intervening years utilizes the estimated population numbers and is noted as such.

Section I: Kentucky's Demographic Profile

Having a firm grasp on the demographic trends and realities facing Kentucky provides a basis for creating effective policies, especially when changes represent a potentially significant impact on the day-to-day operations of the criminal justice system. The first section of the 2011 Edition of the *Sourcebook of Criminal Justice Statistics in the Commonwealth* provides necessary background information for the reader regarding the demographic profile of Kentucky.

Information provided within this section stems from the United States Census Bureau's 2010 Census, the Small Area Population Estimates Division, and the American Community Survey (ACS), which provides population, demographic, and housing unit estimates for communities throughout the nation. ACS data, which is collected every year, provides up to date information about the population at the local community level and serves as a critical element of the decennial census program. About three million housing units from across the nation participate in the ACS annually, and provide critical demographic information about the population including age, race, ethnicity, income, veteran status, housing location and cost, and other economic and social indicators which help to provide an understanding of the population's characteristics. Likewise, since ACS data is collected annually, this mechanism allows conclusions and estimates to be provided for geographic locations with populations of less than 20,000 individuals.

The findings from the U.S. Census 2011 ACS are provided below:

- Kentucky's total population was estimated to be over 4.36 million- About 2.2 million (50.8%) were females. About 23.2% of the population was under age 18, and about 14.0% were over age 65.
- For people reporting only one race about 87.8%, or more than 3.8 million were white, 7.9%, or 344,584 were African American, 1.3%, or 55,397 were Asian/Pacific Islander, and about 0.20%, or 8,141, were American Indian/Alaska Native. More than 38,316 (0.9%) reported their race as "Other" and more than 87,200 identified two or more races (about 2.0%).
- There were over 1.707 million occupied households in Kentucky, with an average size of 2.56 people per house. The median income in 2011 was \$41,724.
- More than 4.243 million Kentucky residents (96.2%) were born in the United States, and of these, over 3.05 million (69.8%) were native born Kentuckians. Approximately 87,030 (1.9%) of Kentucky's 4.38 million residents are not Naturalized U.S. Citizens.
- Among those people who were at least 5 years of age, approximately 4.10 million, 3.90 million, or (95.1%) spoke only English within their homes. Of those 199,467 who spoke a language other than English, 51.6% or 102,993 spoke Spanish.

- Of those more than 2.9 million Kentucky residents aged 25 or more, almost 84% of these have at least a high school diploma and approximately 26.0% have a Bachelor's Degree or higher.
- Of the more than 3.47 million Kentucky residents aged 16 years or older, 2.07 million (59.8%) were in the workplace. The leading industries in Kentucky are Educational and Health Care Services and Social Assistance (24.4%), Manufacturing (13.6%), and Retail Trade (11.9%).
- The most common occupations among Kentucky workers were Management, Business, Science, and Arts Occupations (32.3%), Sales and Office Occupations (24.5%), Service Occupations (16.7%), and Production, Transportation, and Material Moving Occupations (16.7%). 78.7% of the Kentucky workforce is employed for private wages, 15.5% are Government Workers, and 5.6% are Self-Employed. The remaining 0.2% are Unpaid Family Workers.
- Within the past 12 months, 14.8% of all Kentucky Families have had incomes which were below the Federal Poverty Level. 23.4% of those families with children under age 18 met this guideline, as did 26.8% of those with children under age 5. 40.2% of families with a Single Female Head of Household had incomes below the Federal Poverty Level, as have 12.3% of individuals 65 years or older. In households made up of unrelated individuals 15 years or age or older, 33.5% have had incomes below Federal Poverty Guidelines during this period.
- Kentucky had almost 1.94 million housing units, and 88.1% were occupied. 67.0% of the more than 1.70 million occupied units were owner-occupied, with the remaining 562,695 (33.0%) being occupied by renters. The mean number of residents in owner occupied units was 2.56 persons, and in rental units, this number was 2.36 persons. More than 7.7% of those occupied units did not have access to private automobiles as a means of transportation, 0.4% lacked complete plumbing facilities, 0.7% lacked complete kitchen facilities, and 3.2% lack any type of telephone services.
