

# **Sourcebook of Criminal Justice Statistics in the Commonwealth**

**2006**

**Compiled by the Justice & Safety Center at  
Eastern Kentucky University  
on behalf of the  
Kentucky Justice & Public Safety Cabinet**

## Foreword

Dear Policymaker:

It is with great pride that the Kentucky Justice and Public Safety Cabinet releases the 2006 edition of the Sourcebook of Criminal Justice Statistics in the Commonwealth. As the second largest agency in state government, the Justice and Public Safety Cabinet continuously works to improve public safety and the quality of life for the citizens of Kentucky. By providing comprehensive information from all components of the criminal justice system, the Sourcebook continues to encourage data-driven decision-making to aid effective criminal justice policy development in the 21<sup>st</sup> century. The report reflects a unique partnership among criminal justice agencies whose collaborative efforts permit the presentation of a broad overview of the system. As the data infrastructure in Kentucky's criminal justice system continues to improve, we believe the Sourcebook serves as an even more effective tool for meeting critical planning needs and addressing statewide criminal justice policy issues.

In addition to valuable information on crime, arrest, prosecution, correction, and juvenile justice system trends, the fifth edition of the Sourcebook highlights selected crime categories that are currently of interest in the criminal justice system today. These special topics include drug related offenses with a particular focus on methamphetamines and prescription drugs, driving under the influence (DUI) offenses, sex offenses, and school safety. Shared information across agencies presented here allows for a greater understanding of how these crimes are affecting the state.

The following report is organized in a manner that follows traditional movement across the system, from arrest to prosecution to corrections, and should thus be viewed as a systemic integration of data-sharing and analyses. I encourage you to use this report as a convenient and accessible resource and to contact the Cabinet if you have questions or need further information. It is my goal, and that of the Cabinet, for the 2006 Sourcebook to serve as a vital resource for policymakers, state officials, and the citizens of Kentucky. On behalf of the Kentucky Justice and Public Safety Cabinet, I would like to express appreciation to the criminal justice agency personnel and faculty who contributed time and energy to enable the publication of the 2006 edition of the Sourcebook of Criminal Justice Statistics in the Commonwealth.

J. Michael Brown, Secretary  
Kentucky Justice and Public Safety Cabinet

## Acknowledgements

Publication of the fifth edition of the Sourcebook of Criminal Justice Statistics in the Commonwealth was made possible through the commitment and participation of criminal justice and other governmental agency representatives. The Justice and Public Safety Cabinet would like to express its sincere appreciation to the following organizations and agency representatives who contributed to this important data collection project.

### **Administrative Office of the Courts**

- Tammy Collins, Data Analyst II  
Department of Court Services
- Jim Columbia, Information Systems Supervisor  
Court Designated Worker Program
- John Dobson, General Manager  
Department of Court Services

### **Attorney General's Office**

- Corey Bellamy, Internal Policy Analyst

### **Cabinet for Health and Family Services**

- David Gutierrez, Assistant Director  
Department for Human Support Services, Division of  
Child Abuse and Domestic Violence Services
- David R. Hopkins, Project Manager  
Harold Rogers Grant
- Neil Rosenblatt, KPHLI Fellow, Project  
Epidemiologist/GIS Team Lead  
Office of Information Technology

### **Crime Victims Compensation Board**

- Cynthia Newton, Program Coordinator

### **Department of Corrections**

- LaDonna Thompson, Deputy Commissioner  
Office of Support Services
- Ruth C. Thompson, Internal Policy Analyst  
Adult Institutions/Office of Research and Grants

### **Department of Juvenile Justice**

- Mavis Williamson, Juvenile Justice Specialist
- Libby Mills, Assistant Director  
Program Services

### **Department of Public Advocacy**

- David Draggs, Manager  
Information Resources Branch
- Karen King Scales, Program Coordinator  
Information Resources Branch

### **Eastern Kentucky University**

- Kentucky Center for School Safety
- David May, Professor and Kentucky Center for  
School Safety Research Fellow  
Department of Safety, Security, and Emergency  
Management

### **Kentucky Justice & Public Safety Cabinet**

- Tanya Dickinson, Branch Manager  
Grants Management Branch

### **Kentucky Office of Homeland Security**

- Mary Pederson, Chief Information Officer

### **Kentucky Parole Board**

- Melissa Clark, Justice Program Supervisor

### **Kentucky State Police**

- Dorothy Lockett, Program Coordinator  
Uniform Crime Reporting Section

The information presented in this Sourcebook is compiled, edited, and managed by Sourcebook Editor Emily Raine, Research Associate at Eastern Kentucky University's Justice and Safety Center.

## Limitations of Current Data and Information Systems

As you review the information contained in this Sourcebook, it is important to keep in mind that data have been drawn from a number of state level criminal justice computer systems in an attempt to provide a snapshot of crime trends in the Commonwealth. A detailed description of the existing systems can be found in Appendix A. Until these systems are fully integrated into a statewide Unified Criminal Justice Information System, there will remain limitations in the data available for analysis. These and other limitations are delineated below:

- Data collection systems of criminal justice agencies were established independently for in-house data management purposes and not for planning or policy evaluation.
- There are currently no standardized formats for defining data elements or counting criminal justice events. Agencies vary according to what is being counted (e.g. charges, cases, or individuals).
- In an attempt to further unify the data, all data were requested to be reported on a calendar year basis for the 2005 and 2006 editions of the Sourcebook, with the exception of fiscal data. This particular change in the reporting parameters may affect the user's ability to compare data across previous editions of the sourcebook.
- Several agencies have provided updated data for years prior to 2006. As a result, the data in the 2006 Sourcebook may be different than that which is found in earlier editions of the Sourcebook. Where possible, the updated data has been included in order to provide the most accurate data available.
- As a result of the variation across agencies, it is currently not possible to publish a fully integrated criminal justice system report or to perform systemic trend analyses. This report is intended to provide individual snapshots of the key components of the justice system (law enforcement, courts, corrections, prosecution, and defense), and to draw general conclusions regarding system trends where possible.
- During 2006, the U.S. Department of Justice estimates that 48.9% of all violent crime and 37.7% of all property crime was reported to the police. In order to provide a better picture of the actual levels of victimization that are occurring within the Commonwealth, the Justice and Public Safety Cabinet will conduct a crime victimization study in conjunction with the Statistical Analysis Center in the spring of 2008. This study will help to provide a better picture of the actual levels of victimization that are occurring within the Commonwealth.
- Variations in definitions may result in considerable inconsistencies in numbers across agencies. The data may be used to determine whether trends are consistent across agencies, however, individual numbers may differ significantly. This report is expected to improve over time as reporting practices become more consistent.
- Kentucky currently uses the FBI's Summary Uniform Crime Reporting Program (UCR) to collect data. The UCR is a nationwide, cooperative statistical effort of more than 17,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. The UCR includes information on Part I offenses, the violent crimes of murder and non-negligent manslaughter, forcible rape, robbery, aggravated assault and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson. In response to the need for improved statistics, the UCR program has been redesigned into the National Incident-Based Reporting System (NIBRS). NIBRS captures up to 56 data elements via six types of data segments: administrative, offense,

victim, property, offender, and arrestee. As more contributing law enforcement agencies become educated about the rich data available through incident-based reporting and as resources permit, more agencies are implementing the NIBRS. Currently, Kentucky is among 31 state programs representing approximately 37 percent of reporting agencies that are certified for NIBRS participation. Kentucky is in the transition phase from Summary UCR to NIBRS. NIBRS reporting is already taking place in selected law enforcement agencies. As more agencies become technologically able to submit incident based information, Kentucky crime data will become more complete, thus greatly enhancing query capabilities.

- Due to severe weather-related computer problems experienced in 1996, Kentucky State Police (KSP) was unable to produce arrest information for the 1996 through 2001 *Crime in Kentucky* publications. The Administrative Office of the Courts (AOC) cooperated with the agency by providing arrest data from their court records. This should be taken into consideration when working with KSP arrest data from 1996 through 2001. Starting in 2002, the arrest data are compiled strictly from the citations and summary reports submitted to KSP, thus providing more accurate crime statistics.
- In an effort to improve the quality of the Kentucky State Police's annual *Crime in Kentucky* reports, several adaptations were made in 1998 to data reporting that have continued through 2006. These changes may affect the ability to compare data published in the 1998 through 2006 reports.
- The following disclaimer has been issued by the Administrative Office of the Courts and applies to all data within the Sourcebook that is attributed to that agency: "Information received from COURTNET is subject to change(s), reprogramming, modification(s) of format and availability at the direction of the Administrative Office of the Courts (AOC), and may not at any particular moment reflect the true status of court cases due to ordinary limitation(s), delay(s) or error(s) in the system's operation. The AOC disclaims any warranties as to the validity of the information obtained from COURTNET. The recipient is solely responsible for verifying information received from COURTNET through the cross-referencing of official court records. The AOC shall not be liable to the recipient, or to any third party using the system or information obtained therefrom, for any damages whatsoever arising out of the use of COURTNET."

## Executive Summary

As part of its role in statewide criminal justice planning, the Kentucky Justice and Public Safety Cabinet is charged with the dissemination of information on criminal justice issues and crime trends. This report reflects the Cabinet's fifth initiative to provide state officials with comprehensive information from all components of the criminal justice system to permit improved analysis of criminal justice issues and to help guide decision-making and promote effective policy development.

In the pages that follow, leaders will find a description of Kentucky's changing demographic population; data from agencies providing services to victims; data on Part I offenses from the perspective of the courts, corrections, and juvenile justice system; highlights on selected crime categories such as drug offenses, sex offenses, and school safety; and key criminal justice cost information.

### *Kentucky's Changing Demographic Realities*

- In 2006, the state's population was 4,206,074, 51% females and 49% males. The median age was 38.7 years. Approximately 24% of the population were under 18 and 13% were older than 65. It is predicted that by 2025, Kentucky will have the 12<sup>th</sup> highest proportion of seniors in the U.S.
- In 2006, Kentucky's 5.7% unemployment rate ranked the state 46<sup>th</sup> in the nation, with a rate 1.1% higher than the nation average of 4.6%.
- The forecast for Kentucky's economy is moderate growth. In 2006, Kentucky's Gross State Product (GSP) increased to a record \$146 billion, an increase of \$34 billion since 2000. Kentucky's average per capita personal income in 2006 was \$29,719, earning the state a rank of 43<sup>rd</sup> in the U.S. The national average was \$36,629.
- According to estimates released in January 2008 by the U.S. Census Bureau, the number of Kentuckians living in poverty in 2006 rose to approximately 690,000 persons, or 16.8% of the total population. This is a 2% increase in the poverty rate from 2005, and 3.6% higher than the national estimate. Nationwide, the number of individuals in poverty also grew, up from 37,039,804 in 2004 to 38,231,474 in 2005. Among the states, New Hampshire had the lowest estimated poverty rate at 7.6%, Mississippi the highest at 20.6%. Kentucky had the sixth highest poverty rate in the nation.

### *Victim Services*

- Data for this section were provided by V.I.N.E., the Crime Victims Compensation Board, the Cabinet for Health and Family Services, the Administrative Office of the Courts' Court Designated Worker program, and the Kentucky Parole Board.
- According to data provided by the Department of Corrections' V.I.N.E program, in 2006, with the exception of October, victims were approximately equally likely to search for offenders by telephone or via the Internet through VINELink. More notifications were issued by V.I.N.E. in June (with 49,579 calls) than in any other month. November had the lowest number of notification calls (24,047). New V.I.N.E. registrations were equally likely to be made by telephone or through the Internet via VINELink. Victims were least likely to register by calling a VINEWatch operator.

## Sourcebook of Criminal Justice Statistics in the Commonwealth

---

- The Crime Victim Compensation Board granted awards to 1,408 applicants in fiscal year 2006, resulting in \$983,493.64 being distributed to victims of violent crime.
- According to data provided by the Administrative Office of the Courts, in 2006, Jefferson County had the highest number of complaints processed by the CDW program (7,479) and Robertson County had the lowest (18). The majority of complaints processed by the CDW program involved juveniles charged with assault, theft, or burglary. In 2006, 25% of complaints filed with the CDW program resulted in a successful diversion.

### **Reported Crime Trends**

- According to the Kentucky State Police's annual *Crime in Kentucky* reports, the Part I offense rate rose 2.0% between 2004 and 2006. The violent offense rate rose each consecutive year between 2004 and 2006. Though there was no change in the property offense rate between 2004 and 2005, the property offense rate rose slightly in 2006.
- Between 2005 and 2006, the offense rate declined for murder, rape, robbery, and arson. During this same period, the offense rate rose for aggravated assault, burglary, larceny-theft, motor vehicle theft.
- In 2006, with the exception of Virginia, Kentucky had the lowest Part I offense rate among the surrounding states of Indiana, Illinois, Missouri, Ohio, Tennessee, and West Virginia.
- According to the Part I offense rate by county, Fayette and Jefferson counties, the largest urban counties in the state, had the highest Part I offense rates in 2006. Green, Hickman, and Bracken counties had the lowest Part I offense rates. Of cities with a population greater than 10,000, Newport, Paducah, and Hopkinsville had the highest Part I offense rate in 2006.

### **Arrest Trends**

- The Kentucky State Police and the Federal Bureau of Investigation's Uniform Crime Reports provided data on arrests. Between 2004 and 2006, the adult arrest rate for all Part I offenses increased 29.5%. In 2006, the arrest rate in Kentucky was higher than national arrest rates for every Part I offense with the exception of arrests for aggravated assault and auto theft. In fact, arrest rates for murder, burglary, and arson in Kentucky were more than twice the national arrest rate.
- In terms of raw numbers, the majority of suspects arrested in 2006 were white. However, while whites comprised over 90% of Kentucky's population in 2006, only 75% of arrested suspects were white. Compared to the proportion of the population which they comprise, non-whites are over-represented in arrests where the race of the suspect is known. In 2006, 31% of arrestees were women. The offense with the largest percentage of women arrested was larceny-theft; 42% of arrestees were women.

### **Bail Release Trends**

- The Administrative Office of the Courts provided data on bail release trends in the state of Kentucky. In 2006, 67.8% of all Part I offense cases resulted in no bail type, the most common type of bail release. The second most common type of bail release was cash (10.4%) followed by

partially secured (8.6%). From 2002 to 2006, the least common types of bail release of all Part I offenses were federally cut, guaranteed arrest bond certificate, no bail set, and released according to KRS 222.204.

### *Court Disposition and Sentencing Trends*

- Data on court dispositions and sentencing trends were provided by the Administrative Office of the Courts. The total number of cases for Part I offenses decreased from 139,774 cases in 2005 to 132,263 in 2006. There was little variation in the distribution of case dispositions from 2002 through 2006 for all Part I offenses with the exception of rape. After declining from 21% in 2002 to 16% in 2005, the percent of rape case convictions increased to a five year high of 23% in 2006.
- Between 2002 and 2006, an average of 45% of Part I offense cases resulted in conviction and an average of 30% of Part I offense cases resulted in an acquittal or dismissal.
- Prison, life, or 25 years without parole was the most common sentence for all Part I offenses with the exception of larceny/theft. The majority of larceny/theft offenders were sentenced to jail.

### *Trial Court Caseload Trends*

- According to the Administrative Office of the Courts, the number of cases disposed in Circuit Court ranged from a high of 4,697 in the 30<sup>th</sup> Judicial Circuit (Jefferson County) to a low of 183 in the 36<sup>th</sup> Judicial Circuit (Knott and Magoffin Counties). The number of cases disposed in District Court ranged from a high of 121,984 in the 30<sup>th</sup> Judicial District (Jefferson County) to a low of 1,729 in the 59<sup>th</sup> Judicial District (Ballard and Carlisle Counties).
- Figures provided by the Department of Public Advocacy indicate that in 2006, 99% (144,408 cases) of the agency's caseload was handled by the Trial Division. Of these cases, 77% were heard in District Court. The workload of the Department of Public Advocacy Field Offices has increased 36% from FY 2002 (101,311 cases) to FY 2006 (137,923 cases).

### *Appellate Court Caseload Trends*

- According to the Administrative Office of the Courts, the number of cases disposed in the Court of Appeals declined each year from 2002 to 2005 and increased slightly in 2006. The majority of cases in the Court of Appeals are criminal appeals and civil appeals. From 2002 to 2006, over 50% of the cases disposed in the Court of Appeals have consistently been civil appeals.
- The number of cases disposed in the Supreme Court increased each year from 2002 to 2005 and decreased slightly in 2006. In 2006, almost 90% of cases disposed in the Supreme Court were either motions for discretionary review or direct appeals/original actions.

### *Commitment and Release Trends*

- The Department of Corrections reports that the average sentence for property and violent offenses remained relatively stable between 2001 and 2004, increased in 2005, and decreased in 2006. Between 2002 and 2006, the most significant increase in the average sentence for a Part I offense was for rape (74%). The second highest increase was for larceny-theft (61%) followed by aggravated assault (57%). Between 2005 and 2006, the number of new commitments decreased

for all Part I offenses. The offense with the largest percent decrease in new commitments between 2005 and 2006 was rape.

- According to the Kentucky Parole Board, the percentage of inmates deferred increased between 2003 and 2006. The percentage of inmates serving out their sentence increased between 2003 and 2004 but decreased in both 2005 and 2006.

### *Juvenile Justice System Trends*

- The Kentucky State Police reported that the juvenile arrest rate for burglary showed the most significant increase (50.6%) between 2004 and 2006 compared to all other Part I offenses. The juvenile arrest rate for rape showed the most significant decrease (52.1%) compared to all other Part I offenses during this period. In 2006, compared to national juvenile arrest rates for Part I offenses, Kentucky's juvenile arrest rates were lower for aggravated assault, robbery, larceny/theft, and auto theft but higher for murder, rape, burglary, and arson. For all Part I offenses combined, Kentucky's juvenile arrest rate was just .03% higher than the national juvenile arrest rate in 2006.
- The Department of Juvenile Justice reported that the total number of juveniles adjudicated for Part I offenses rose between 2002 and 2003 and then declined each consecutive year thereafter. In 2006, the average length of stay for juveniles adjudicated for murder (471 days) was higher than the average length of stay for any other Part I offense. The shortest average length of stay was for juveniles adjudicated for robbery (228 days). After remaining relatively stable between 2003 and 2005, the total number of youth served by the juvenile justice system increased to 2,977 in 2006. From 2002 through 2006, the majority of youth served by the juvenile justice system were placed in the home under the supervision of a parent or guardian.

### *Selected Crime Categories*

#### **Drug Related Offenses**

- The Kentucky State Police reported that the total number of arrests for drug offenses increased 38.2% between 2004 and 2006. During this period, the most significant increase in the number of drug arrests involved arrests for opium or cocaine and their derivatives (53.5%). The arrest rate for drug offenses varies significantly across jurisdictions, ranging from a low of 1.3 arrests per 1,000 persons in Robertson County to a high of 32.5 arrests per 1,000 persons in Lyon County.

#### **Methamphetamine Related Offenses**

- Data provided by the Kentucky State Police indicate that the largest number of methamphetamine related offenses and arrests were related to manufacturing.
- According to the Administrative Office of the Courts, after reaching a five year high of 5,872 cases in 2005, the total number of cases involving methamphetamine offenses decreased to 4,100 in 2006. The percentage of methamphetamine cases resulting in a conviction reached a five year high in 2006 with 29% of cases resulting in conviction.
- After increasing each year from 2002 and 2005, the number of new commitments to the Department of Corrections for methamphetamine offenses fell in 2006.

### Prescription Drug Related Offenses

- According to the Kentucky State Police, the largest number of prescription drug related offenses and arrests were related to possession.
- The Administrative Office of the Courts reported that in 2006, 35% of prescription drug related cases resulted in a conviction. The percent of prescription drug related cases resulting in conviction remained relatively stable over the five year period between 2002 and 2006. In 2006, the number of prescription drug related cases reached a five-year high of 6,746 cases.
- Data from the Kentucky All Schedule Prescription Electronic Reporting (KASPER) system indicate that in 2006, Whitley County had the highest rate of prescriptions dispensed for all controlled substances (4038.7 prescriptions dispensed per 1,000 population) and Russell County had the lowest rate (937.3 prescriptions dispensed per 1,000 population).

### Driving Under the Influence (DUI) Offenses

- Data provided by the Kentucky State Police reveal that in 2006, Cumberland, Carroll, Fulton, Rowan, and Daviess Counties had the highest DUI arrest rates in the state, averaging 17.9 arrests per 1,000 population per county. Fleming, Jackson, Larue, Bracken, and Robertson had the lowest DUI arrest rates in the state, averaging 2.4 arrests per 1,000 population per county.
- The Administrative Office of the Courts reports that between 2002 and 2006, the DUI caseload in Magoffin County more than doubled, making it the county with the largest percent increase over this five year period. With only 12 cases in 2006, Robertson County had the fewest DUI cases compared to any other county. Jefferson County had the most DUI cases with a total of 4,741 cases in 2006. The percent of all DUI cases resulting in a conviction has remained stable over the five year period between 2002 and 2006. In 2006, 68% of all DUI cases resulted in a conviction. However, when broken down by offense, the rate of conviction decreased with each subsequent DUI offense. For example, in 2006, 70% of individuals charged with their first DUI offense were convicted while just 27% of individuals charged their 4<sup>th</sup> DUI were convicted.

### Sex Offenses

- Data from the Kentucky State Police indicate that the number of forcible rapes rose 3.3% between 2004 and 2006. The rate of forcible rape in Kentucky was lower than the national rate in 2004, 2005, and 2006. In 2006, Illinois, Ohio, and Tennessee had higher rates of forcible rape than Kentucky while Indiana, Missouri, Virginia, and West Virginia had lower rates of forcible rape.
- According to the Administrative Office of the Courts, the total number of rape, sodomy, and sexual abuse cases declined between 2005 and 2006. Of all sex offense cases, those involving sexual abuse had the highest percentage resulting in conviction.
- The total number of sex offenders newly committed to the Department of Corrections decreased from 538 offenders in 2005 to 454 offenders in 2006. The number of sex offenders serving out their sentence more than doubled between 2004 and 2006.

### School Safety

- For the 2005-2006 school year, KCSS published its seventh annual report on school safety. The report confirmed that many of the efforts to reduce school crime had indeed been successful.
- The total number of disciplinary actions for Part I law violations in the 2005-2006 school year decreased 74% from the number reported in the 2002-2003 school year. The total number of disciplinary actions for Part II law violations in the 2005-2006 school year decreased 31% from the number reported in the 2002-2003 school year.
- Compared to the 2003-2004 school year, the number of reported law violations decreased for each Part I offense except for robbery and burglary in the 2005-2006 school year. Assaults and drug abuse violations continue account for the largest number of Part II law violations.
- The total number of disciplinary actions for incidents involving handguns and weapons other than handguns decreased 26% between the 2003-2004 and 2005-2006 school years.

### *Key Criminal Justice Cost Information*

- In FY 2006, Kentucky's criminal justice enacted budgets totaled \$1,007,906,100.00.
- According to the Department of Corrections, the cost per inmate per day in Kentucky's correctional institutions varies by level of security, from \$32.53 (Marion Adjustment Center) to \$69.13 (Kentucky State Reformatory). In FY 2006, the Department of Corrections spent \$43,523,782.38 on medical expenditures.
- According to the Department for Juvenile Justice, the total annual costs for juvenile institutions, including detention centers, youth development centers, and group homes, was \$52,547,137.00.
- In FY 2006, \$59,327,547.76 was spent on substance abuse programming by state agencies.

# Section I: Kentucky's Changing Demographic Realities

## Population Realities

The United States is in the midst of a major demographic revolution. Throughout history, the division of the population by age has always resembled a pyramid, where each younger generation was larger in number, better educated, and more competitive than the previous generation. As the Baby Boomer generation advances in age, this trend is changing. The Baby Boomer generation represents the 76 million Americans born between 1946 and 1964. As the single largest sustained population growth cohort in the U.S., it is no surprise that the aging of such a large number of people would garner the attention of policymakers across the country. As Baby Boomers age and improved healthcare increases life expectancies, it is clear that this demographic revolution has real long term implications for public policy. The aging population will influence everything from the economy to societal assumptions about aging. This change in demographics will shape future policy. For example, we are likely to see improved public health care coverage, better regulation of aging citizen's care and benefits, the development of more long-term care facilities, and provisions to maintain economic security for the retired population.

Kentucky's demographic reality mirrors that of the nation. In 2006, the state's population was 4,206,074, 51% females and 49% males. The median age was 38.7 years. Approximately 24% of the population were under 18 and 13% were older than 65. In 2000, Kentucky ranked 27<sup>th</sup> in the nation for its proportion of residents age 65 and over. It is predicted that by 2025, Kentucky will have the 12<sup>th</sup> highest proportion of seniors in the U.S.

It is important to acknowledge that Kentucky's changing demographic realities have an impact on the criminal justice system. As the population ages and the number of mature and aging adults outweighs the number of teens and young adults, changes in the criminal justice system are expected. The percentage of the population most likely to commit crimes will likely be smaller than the aging population, therefore crime may potentially decline. If the population of inmates in jails and prisons reflects the transformation of the demographic profile of the state and nation, there may be an increase in medical expenditures in jails and prisons as a growing portion of their population will be older.

## Economic Realities

The forecast for Kentucky's economy is moderate growth. In 2006, Kentucky's Gross State Product (GSP) increased to a record \$146 billion, an increase of \$34 billion since 2000. The potential for economic growth continues to improve as Kentucky develops its ability to draw in new industry. Manufacturing continues to be the state's largest industrial sector; however, the percentage of Kentucky's economy attributed to this sector has declined over the past few years. While manufacturing accounted for 27.8% of Kentucky's GSP in 1997, by 2004, this percentage had fallen to 18.7%.

Kentucky's exports increased significantly during 2006, further securing the state's influence in the global economy. Kentucky secured its position as the 18<sup>th</sup> highest exporter of goods in 2006, exporting \$17.2 billion of goods. Per capita, the state ranked 8<sup>th</sup> in the exportation of goods. Manufactured goods accounted for the majority of Kentucky's exports (97.3%). Among Kentucky's top ten exports, livestock was the only non-manufacturing industry. Kentucky ranks first in the nation in both livestock exports and equine/pure breeding animal exports.

In 2006, the manufacturing industry employed 260,923 workers with an average annual income of \$36,722. The construction industry employed 83,517 workers with an average annual income of \$36,174. Finally, with an average annual income of \$38,704, establishments in the mining industry employed 22,447 workers in Kentucky. Kentucky's average per capita personal income in 2006 was \$29,719, earning the state a rank of 43<sup>rd</sup> in the U.S. The national average was \$36,629.

Today, most available jobs require education and/or training beyond high school. Education is highly valued in a knowledge economy and it is this awareness that has fueled Kentucky to prioritize the pursuit of higher education. Recent initiatives to promote education are paying off and the number of post-secondary degrees awarded in Kentucky has risen considerably. Despite this progress, in 2006, the percentage of Kentuckians age 25 and older with a bachelor's degree or higher (20.2%) was still well below the national average (28.0%). In 2005, the percentage of adults over the age of 25 with a high school education or higher was 79.9%, which ranked the state 49<sup>th</sup> in the nation.

After reaching an exceptional low in 2000, Kentucky's unemployment rate began to rise, peaking in July of 2003 at 6.5%. In 2006, Kentucky's 5.7% unemployment rate ranked the state 46<sup>th</sup> in the nation, with a rate 1.1% higher than the nation average of 4.6%.

According to estimates released in January 2008 by the U.S. Census Bureau, the number of Kentuckians living in poverty in 2006 rose to approximately 690,000 persons, or 16.8% of the total population. This is a 2% increase in the poverty rate from 2005, and 3.6% higher than the national estimate. Nationwide, the number of individuals in poverty also grew, up from 37,039,804 in 2004 to 38,231,474 in 2005. Among the states, New Hampshire had the lowest estimated poverty rate at 7.6%, Mississippi the highest at 20.6%. Kentucky had the sixth highest poverty rate in the nation.

### Geographic Realities

Kentucky ranks 36<sup>th</sup> in land area among the U.S. states with 39,728 sq mi. With 84,000 farms, the state is tied for 4<sup>th</sup> in the nation with Tennessee according to the total number of farms per state. The state experienced significant population growth during the 1990's in the state's metropolitan areas, the metropolitan fringe, and along the interstate corridors. Population shifts also occurred as a result of migration both into and out of the state.

Migration is currently the key indicator of population growth rates in Kentucky. During the period from 2000-2005 population growth from domestic migration (44,188 persons) was greater than from international migration (30,889 persons). In terms of domestic migration, out-migration of persons with a college education and persons in professional or highly technical jobs was greater than in-migration of similarly classified persons. Even though non-whites still make up a fairly small portion of Kentucky's population, migration has certainly accelerated the growth of the minority populations. Between 2000 and 2005, the state's Hispanic population grew 35%.

It is important for policymakers to be aware of both the positive and negative trends that affect the state. Kentucky's changing demographic realities require us to understand and address their impact on the criminal justice system. As readers analyze the following criminal justice statistics, it is useful to consider them within the context of the demographic realities of the state.

## Section II: Victim Services

Kentucky has established many successful programs to provide services and aid to victims of crime. Providing services to victims of crime is an important element of the criminal justice system. Data for this section were provided by V.I.N.E., the Crime Victims Compensation Board, the Cabinet for Health and Family Services, and the Kentucky Parole Board.

## V.I.N.E.

The Office of Victim Services is the arm of the Department of Corrections that provides victims with an automatic notification system to alert them about a change in the custody status of their offender. The system is known as Victim Information and Notification Everyday (V.I.N.E.).

The nation's first automated victim notification system was created in Jefferson County, Kentucky, in December 1994. Like many progressive acts, a tragedy was the impetus for the establishment of the V.I.N.E. system. In 1993, Mary Byron was murdered by her estranged boyfriend after he was released from the Jefferson County Jail. Byron was not notified of his release. Byron's parents, Pat and John Byron, led a crusade to ensure that their daughter's death would not be in vain. As a result of their efforts, software engineers developed the V.I.N.E. system and implemented it at the Jefferson County Jail. In 1996, Kentucky again led the way, becoming the first state in the nation to provide victim notification on a statewide basis. Today, more than 2,100 communities nationwide have implemented the V.I.N.E. system. More than two-thirds of the states have established statewide notification through V.I.N.E. The federal government also offers a victim notification service. Nationally, V.I.N.E. generates approximately 700,000 notification calls each month.

The V.I.N.E. system receives booking and release data from all county jails and Department of Corrections institutions. Victims can obtain information about an offender's location, custody status, sentence expiration date, and scheduled parole hearing date. The victim can also register to be notified of changes in an offender's custody status. Information can be obtained by calling a toll free number, by calling the Office of Victim Services, via email, or via the Internet through VINELink. The service is available 24 hours a day. Whenever possible the system provides notification of an offender's release 72 hours prior to the release. In order to ensure that victims receive notification in a timely manner, V.I.N.E. will call the registered telephone number every 30 minutes during a 24 hour time period or until the call is acknowledged by the registered person.

The following information was obtained from the Office of Victim Services in the Department of Corrections:

- In 2006, there was little variation in the number of victims searching for offenders by telephone or via the internet through VINELink.
- More notifications were issued by V.I.N.E. in June (with 49,579 calls) than in any other month. November had the lowest number of notification calls (24,047).
- New V.I.N.E. registrations were equally likely to be made by telephone or through the Internet via VINELink. Victims were least likely to register by calling a VINEWatch operator.

## Crime Victims Compensation Board

Legislation establishing the Crime Victims Compensation Board (CVCB) was enacted in 1974. The office opened in 1978 with the purpose of compensating victims for whom violent crime has resulted in financial hardship due to physical and psychological injury or death. Applicants may receive awards of up to \$25,000 for medical services, hospital expenses, funeral expenses, counseling, loss of wages, and/or benefits for the dependents of a victim who is deceased. The board operates under Kentucky Revised Statute (KRS) 346 and Kentucky Administrative Regulations (KAR) Title 107. The role of the board is to determine eligibility and amount of reimbursement to crime victims.

The following information was received from the Crime Victims Compensation Board.

- The CVCB granted awards to 1,408 applicants in fiscal year 2006, resulting in \$983,493.64 being distributed to victims of violent crime.
- Awards were most commonly made for health-related expenses; the least common need for which an award was granted was attorney fees.

**Table 2.4: Awards Made by the Crime Victims Compensation Board by Type of Expense, FY 2006**

Type of Expense	Number of Claims	Amount Awarded
Attorney Fees	1	\$400.00
Economic Support (lost wages/loss of support)	54	\$161,196.78
Funeral/Burial	81	\$317,147.52
Medical/Dental/Mental Health Counseling	1,272	\$504,749.34
<b>Total</b>	<b>1,408</b>	<b>\$983,493.64</b>

Kentucky Crime Victims Compensation Board.

## Other Victim Services

Both the Kentucky Cabinet for Health and Family Services (CHFS) and the Kentucky Parole Board provide services to victims. CHFS houses several programs that serve victims of crime including rape crisis centers, domestic violence shelters, and children's advocacy centers. The data provided by CHFS detail the types of services provided through these programs and the number of victims served. The Kentucky Parole Board provided the number of victim hearings held each month in 2006.

- In FY 2006, Kentucky's rape crisis centers provided services to 5,575 victims. That same year, the center provided education services to 185,062 participants. The centers logged 193,090 volunteer hours.
- Domestic violence shelters in the Commonwealth served 4,209 residents in FY 2006. Domestic violence shelters served an additional 23,453 non-residential clients.
- Children's advocacy centers served 4,179 child victims. The centers provided 1,704 medical exams and 2,013 forensic interviews.
- In 2006, the Kentucky Parole Board conducted 217 victim hearings.

## Section III: Reported Crime Trends

In reviewing data on crime trends, it is important to note the type of data being presented along with the inherent limitations of that data. For example, although law enforcement agencies collect and maintain information on both arrests and offenses reported to the police, researchers generally agree that reported offenses provide a better measure of crime since these reports usually occur closer in time to the actual incidents. While arrests also provide a measure of law enforcement activity, arrests may not be made in all cases and arrests may also reflect specialized enforcement efforts rather than an actual increase in the incidence of crime. Information on Part I offense trends are provided in the following section. The data on Part I offenses are presented for calendar years 2004-2006, as reported to the Kentucky State Police.

- The Part I offense rate rose 2.0% between 2004 and 2006.
- The violent offense rate rose each consecutive year between 2004 and 2006. Though there was no change in the property offense rate between 2004 and 2005, the property offense rate rose slightly in 2006.
- Between 2005 and 2006, the offense rate declined for murder, rape, robbery, and arson. During this same period, the offense rate rose for aggravated assault, burglary, larceny-theft, and motor vehicle theft.
- After increasing 44.1% between 2004 and 2005, the offense rate for arson declined 6.4% in 2006.
- The offense rate for murder decreased 20.7% between 2004 and 2006, the most significant decrease in the offense rate for a Part I offense during this period.
- In 2006, with the exception of Virginia, Kentucky had the lowest Part I offense rate among the surrounding states of Indiana, Illinois, Missouri, Ohio, Tennessee, and West Virginia.
- Fayette and Jefferson counties, the largest urban counties in the state, had the highest Part I offense rates in 2006. Green, Hickman, and Bracken counties had the lowest Part I offense rates.
- Of cities with a population greater than 10,000, Newport, Paducah, and Hopkinsville had the highest Part I offense rate in 2006.

## Section IV: Arrest Trends

This section presents information on arrest trends in the Commonwealth as compiled by the Kentucky State Police.

- The adult arrest rate for all Part I offenses increased 29.5% between 2004 and 2006.
- In 2006, the arrest rate in Kentucky was higher than national arrest rates for every Part I offense with the exception of arrests for aggravated assault and auto theft. In fact, arrest rates for murder, burglary, and arson in Kentucky were more than twice the national average.
- In terms of raw numbers, the majority of suspects arrested in 2006 were white. However, while whites comprised over 90% of Kentucky's population in 2006, only 75% of arrested suspects were white. Compared to the proportion of the population which they comprise, non-whites are over-represented in arrests where the race of the suspect is known.
- In 2006, 50.3% of arrests for robbery, 30.9% of arrests for aggravated assault, and 25.7% of arrests for murder were of non-whites.
- In 2006, 31% of arrestees were women. The offense with the largest percentage of women arrested was larceny-theft; 42% of arrestees were women.

## Section V: Bail Release Trends

This section presents data about the types of bail release used in the Commonwealth. The information reported in this section pertains only to cases in which pre-trial release was granted by the court.

- In 2006, 67.8% of all Part I offense cases resulted in no bail type, the most common type of bail release.
- The second most common type of bail release in 2006 was cash (10.4%) followed by partially secured (8.6%).
- From 2002 to 2006, the least common types of bail release of all Part I offenses were federally cut, guaranteed arrest bond certificate, no bail set, and released according to KRS 222.204.

## Section VI: Court Disposition and Sentencing Trends

This section presents information from the Administrative Office of the Courts on case dispositions and sentencing trends for Part I offenses.

- The total number of cases for Part I offenses decreased from 139,774 cases in 2005 to 132,263 in 2006.
- There was little variation in the distribution of case dispositions from 2002 through 2006 for all Part I offenses with the exception of rape.
- After declining from 21% in 2002 to 16% in 2005, the percent of rape case convictions increased to a five year high of 23% in 2006.
- Between 2002 and 2006, an average of 45% of Part I offense cases resulted in conviction and an average of 30% of Part I offense cases resulted in an acquittal or dismissal.
- After increasing each consecutive year between 2002 and 2005, the total number of cases for murder and rape decreased in 2006.
- Prison, life, or 25 years without parole was the most common sentence for all Part I offenses with the exception of larceny/theft. The majority of larceny/theft offenders were sentenced to jail.
- In 2006, for all Part I offenses, 68.5% of offenders were sentenced to jail, 16.8% of offenders were sentenced to prison, life, or 25 years without parole, and 10.2% were granted state or local probation. However, when larceny/theft offenders are excluded, 68.4% of offenders were sentenced to prison, life, or 25 years without parole, and 20.7% were granted state or local probation, and 9.8% were sentenced to jail.
- The only offense category in which the sentence of death was imposed was murder/manslaughter. After declining from 3.6% of cases in 2004 to 0.5% of cases in 2005, the percentage of murder/manslaughter cases resulting in the sentence of death rose to 3.8% in 2006.

Administrative Office of the Courts.

## Section VII: Trial Court Caseload Trends

In this section, Circuit and District Court case data from the Administrative Office of the Courts and data from the Department of Public Advocacy are presented.

- The number of cases disposed in Circuit Court varies greatly by circuit. In 2006, the number of cases disposed ranged from a high of 4,697 in the 30<sup>th</sup> Judicial Circuit (Jefferson County) to a low of 183 in the 36<sup>th</sup> Judicial Circuit (Knott and Magoffin Counties).
- With a 141% increase between 2003 and 2006, the 33<sup>rd</sup> Judicial Circuit (Perry County) had the largest percent increase in cases disposed in Circuit Court.
- The number of cases disposed in District Court varies greatly by district. In 2006, the number of cases disposed ranged from a high of 121,984 in the 30<sup>th</sup> Judicial District (Jefferson County) to a low of 1,729 in the 59<sup>th</sup> Judicial District (Ballard and Carlisle Counties).
- With a 27% increase between 2003 and 2006, the 7<sup>th</sup> Judicial District (Logan and Todd Counties) had the largest percent increase in cases disposed in District Court.
- Statewide, the number of appeals disposed in Circuit Court decreased each year between 2003 and 2006. After increasing each year between 2002 and 2004, the number of felony cases disposed in Circuit Court decreased each year between 2004 and 2006.
- Statewide, the number of criminal cases disposed in District Court remained relatively stable with the exception of domestic violence cases which decreased significantly (42%) between 2002 and 2006.
- In 2006, 99% (144,408 cases) of the Department of Public Advocacy's caseload was handled by the Trial Division. Of these cases, 77% were heard in District Court.
- The workload of the Department of Public Advocacy Field Offices has increased 36% from FY 2002 (101,311 cases) to FY 2006 (137,923 cases).

## Section VIII: Appellate Court Caseload Trends

This section presents information from Kentucky's Appellate and Supreme Courts.

- The number of cases disposed in the Court of Appeals declined each year from 2002 to 2005 and increased slightly in 2006.
- From 2002 to 2006, over 50% of the cases disposed in the Court of Appeals have consistently been civil appeals.
- The number of cases disposed in the Supreme Court increased each year from 2002 to 2005 and decreased slightly in 2006.
- In 2006, almost 90% of cases disposed in the Supreme Court were either motions for discretionary review or direct appeals/original actions.

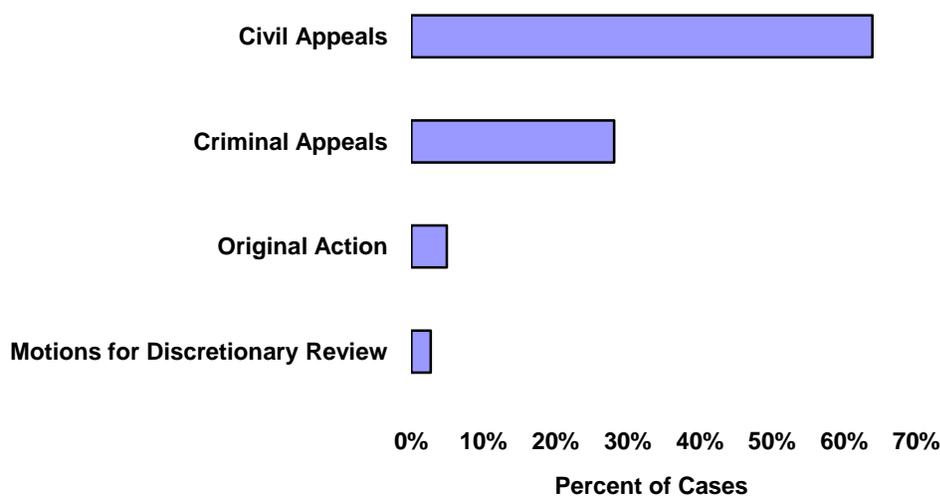

**Table 8.1: Court of Appeals Caseload, 2002-2006**

## Section IX: Commitment and Release Trends

This section presents information from the Department of Corrections (DOC) on commitments, sentences, and releases for Part I offenses, and from the Parole Board on hearings, paroles, deferrals, and serve-outs.

- The average sentence for property and violent offenses remained relatively stable between 2001 and 2004, increased in 2005, and decreased in 2006.
- Between 2002 and 2006, the most significant increase in the average sentence for a Part I offense was for rape (74%). The second highest increase was for larceny-theft (61%) followed by aggravated assault (57%).
- Between 2005 and 2006, the number of new commitments decreased for all Part I offenses.
- The offense with the largest percent decrease in new commitments between 2005 and 2006 was rape.
- After increasing each year between 2003 and 2005, the number of rape offenders serving out their sentences decreased in 2006.
- After remaining relatively stable between 2002 and 2004 and increasing dramatically in 2005, the number of new commitments for robbery declined marginally in 2006. The number of serve-outs and shock probations for robbery remained relatively stable from 2002 to 2006. The number of paroled robbery offenders fell to a five year low in 2006.
- After increasing each year between 2002 and 2005, the number of aggravated assault offenders serving out their sentence decreased in 2006.
- After increasing between 2003 and 2005, the number of larceny/theft offenders serving out their sentences decreased 10% between 2005 and 2006.
- The number of new commitments, paroles, and serve-outs for arson increased between 2004 and 2005 but declined in 2006. Most significant was the 26% decrease in serve-outs between 2005 and 2006.
- The percentage of inmates deferred increased between 2003 and 2006. The percentage of inmates serving out their sentence increased between 2003 and 2004 but decreased in both 2005 and 2006.

## Section X: Juvenile Justice System Trends

This section presents information on juvenile offenders served by the juvenile justice system. Data are presented from the Kentucky State Police, Department of Juvenile Justice, and the Administrative Office of the Courts' Court Designated Worker Program. It is important to note that the information from the Department of Juvenile Justice reflects the number of adjudicated youth served (not placed) by the Department. These youth may have been served in more than one program type during this period.

- Increasing from 71.9 arrests per 100,000 juveniles in 2004 to 108.4 arrests per 100,000 juveniles in 2006, the juvenile arrest rate for burglary showed the most significant increase (50.6%) compared to all other Part I offenses during this period.
- Falling from 7.9 arrests per 100,000 juveniles in 2004 to 3.8 arrests per 100,000 juveniles in 2006, the juvenile arrest rate for rape showed the most significant decrease (-52.1%) compared to all other Part I offenses during this period.
- Between 2005 and 2006, the juvenile arrest rate decreased for murder, rape, aggravated assault, robbery, and auto theft.
- In 2006, compared to national juvenile arrest rates for Part I offenses, Kentucky's juvenile arrest rates were lower for aggravated assault, robbery, larceny/theft, and auto theft but higher for murder, rape, burglary, and arson.
- For all Part I offenses combined, Kentucky's juvenile arrest rate was just .03% higher than the national juvenile arrest rate in 2006.
- The total number of juveniles adjudicated for Part I offenses rose between 2002 and 2003 and then declined each consecutive year thereafter.
- In 2006, the average length of stay for juveniles adjudicated for murder (471 days) was higher than the average length of stay for any other Part I offense. The shortest average length of stay was for juveniles adjudicated for robbery (228 days).
- After remaining relatively stable between 2003 and 2005, the total number of youth served by the juvenile justice system increased to 2,977 in 2006.
- From 2002 through 2006, the majority of youth served by the juvenile justice system were placed in the home under the supervision of a parent or guardian.

## Court Designated Worker Program

In 1986, the Kentucky General Assembly enacted legislation to provide a statewide Court Designated Worker (CDW) program under the direction of the Department of Juvenile Services of the Administrative Office of the Courts, the administrative arm of the Kentucky Court of Justice. The mission of the CDW program is to reduce delinquency among Kentucky's youth through a collaboration of statewide pre-court services and programs that promote education and accountability. CDWs process juvenile complaints against individuals under the age of 18. The complaints are known as public offenses or status offenses. Public offenses are the same as adult crimes. Status offenses are noncriminal forms of juvenile behavior, such as running away from home, skipping class, tobacco offenses or exhibiting beyond-control behaviors at home or at school.

Each of Kentucky's 120 counties has access to the services of a CDW who is available 24 hours a day, seven days a week. A set of uniform criteria determine which juvenile complaints must be forwarded to formal court and which are eligible for informal processing through the CDW program. More serious offenses and repeat offenders are referred to formal court. Juveniles involved in minor offenses are generally eligible for informal processing and enter diversion agreements. A diversion agreement is a voluntary contract between the CDW and the juvenile to resolve a complaint. The data included in this section were provided by the Administrative Office of the Courts.

- In 2006, Jefferson County had the highest number of complaints processed by the CDW program (7,479) and Robertson County had the lowest (18).
- The majority of complaints processed by the CDW program involved juveniles charged with assault, theft, or burglary.
- In 2006, 25% of complaints filed with the CDW program resulted in a successful diversion.

## Section XI: Selected Crime Categories

In addition to reviewing criminal justice system data pertaining to Part I offenses, data on selected categories of crime have been included for informational purposes. These categories include drug related offenses with a particular focus on methamphetamines and prescription drugs, driving under the influence (DUI) offenses, sex offenses, and school safety. Information presented in this section includes Kentucky State Police arrest data, Federal Bureau of Investigation Uniform Crime Report arrest and offense statistics, conviction and disposition information provided by the Administrative Office of the Courts, information on commitments provided by the Department of Corrections, data from the Cabinet for Health and Family Services' Kentucky All Schedule Prescription Electronic Reporting (KASPER) system, and finally data from the Kentucky Center for School Safety.

## Drug Related Offenses

- The total number of arrests for drug offenses increased 38.2% between 2004 and 2006.
- Between 2004 and 2006, the most significant increase in the number of drug arrests involved arrests for opium or cocaine and their derivatives (53.5%).
- The arrest rate for drug offenses varies significantly across jurisdictions. In 2006, it ranged from a low of 1.3 arrests per 1,000 persons in Robertson County to a high of 32.5 arrests per 1,000 persons in Lyon County.

**Table 11.1: Drug Arrests by Type of Substance, 2004-2006**

	2004	2005	2006	Percent Change 2004-2005*	Percent Change 2005-2006*	Percent Change 2004-2006*
Opium or Cocaine and Their Derivatives	5,092	6,141	7,815	20.6%	27.3%	53.5%
Marijuana	15,911	16,913	21,688	6.3%	28.2%	36.3%

## Methamphetamine Related Offenses

- The largest number of methamphetamine related offenses and arrests were associated with manufacturing.
- After reaching a five year high of 5,872 cases in 2005, the total number of cases involving methamphetamine offenses decreased to 4,100 in 2006.
- The total number of methamphetamine cases in juvenile court has declined each year between 2002 and 2006.
- The percentage of methamphetamine cases resulting in a conviction reached a five year high in 2006 with 29% of cases resulting in conviction.
- After increasing each year from 2002 and 2005, the number of new commitments to the Department of Corrections for methamphetamine offenses fell in 2006.

## Prescription Drug Related Offenses

Misuse, abuse and illegal sale of prescription drugs are some of the largest threats to patient safety in the Commonwealth of Kentucky. These problems have reached epidemic proportions, with more and more incidents of “doctor shopping” being uncovered, and the street values of “legal” drugs reaching all-time highs.

The Kentucky All Schedule Prescription Electronic Reporting (KASPER) system catalogs most of the schedule II-V controlled substance prescriptions written and dispensed within the state, and provides a tool for practitioners, pharmacists and law enforcement to improve patient safety and fight the abuse and diversion of controlled substance prescription drugs. KASPER is Kentucky’s Prescription Monitoring Program (PMP). Currently 26 states have implemented PMPs and 8 more have passed legislation to create a PMP. PMPs vary in their characteristics, but they all have a common goal of reducing prescription drug abuse and diversion. KASPER is one of the most comprehensive Prescription Monitoring Programs (PMPs) in the country. In February 2006, President Bush released a national drug control strategy that hails KASPER as one of the nation’s flagship PMPs.

Responsibility for KASPER resides in the Cabinet for Health and Family Services, Office of the Inspector General, with maintenance and enhancements to the system provided by the Cabinet’s Office of Information Technology. Kentucky statutes require dispensers of controlled substances to report the prescriptions dispensed once within every eight days. These data are received by a data collection agent that then has an additional eight days to edit and process the data and provide the data to the Cabinet, where the data is loaded into the KASPER system. The data are then available to authorized users of the system, who may be prescribers for medical treatment of a patient, dispensers for pharmaceutical treatment of a patient, law enforcement officers for an active drug related investigation, licensing boards for a licensee, the Kentucky Medicaid program for a recipient, a grand jury (by subpoena), and a judge or probation or parole office administering a drug diversion or probation program.

A KASPER report shows all controlled substance prescriptions a patient has had for a specified time period, as well as the doctor who prescribed them and the dispenser who dispensed them. Kentucky Revised Statute 218A.240 provides that the Cabinet shall use the data for investigations, research, statistical analysis and educational purposes, and shall proactively identify trends in controlled substance usage and other potential problem areas.

This section includes data on prescription drug activity in the Commonwealth as collected by the Kentucky State Police, Administrative Office of the Courts, and KASPER.

- The largest number of prescription drug related offenses and arrests were related to possession.
- In 2006, 35% of prescription drug related cases resulted in a conviction. The percent of prescription drug related cases resulting in conviction has remained relatively stable over the five year period between 2002 and 2006.
- In 2006, the number of prescription drug related cases reached a five-year high of 6,746 cases.
- In 2006, Whitley County had the highest rate of prescriptions dispensed for all controlled substances (4038.7 prescriptions dispensed per 1,000 population). Russell County had the lowest rate (937.3 prescriptions dispensed per 1,000 population).

U.S. Bureau of the Census, Population Division. " Table 1: Annual Estimates of the Population for Counties of Kentucky: April 1, 2000 to July 1, 2006 (CO-EST2006-01-21)." Retrieved November 1, 2007 from [http://www.census.gov/popest/counties/CO-EST2006-popchg2000\\_2006.html](http://www.census.gov/popest/counties/CO-EST2006-popchg2000_2006.html).

## Driving Under the Influence (DUI) Offenses

- In 2006, Cumberland, Carroll, Fulton, Rowan, and Daviess Counties had the highest DUI arrest rates in the state, averaging 17.9 arrests per 1,000 population per county.
- In 2006, Fleming, Jackson, Larue, Bracken, and Robertson had the lowest DUI arrest rates in the state, averaging 2.4 arrests per 1,000 population per county.
- After decreasing each consecutive year between 2002 and 2004, the total number of adult DUI arrests increased in both 2005 and 2006.
- There was little variation in the distribution of women and men arrested for DUI from 2002 through 2006.
- Between 2002 and 2006, the DUI caseload in Magoffin County more than doubled, making it the county with the largest percent increase over this five year period.
- With only 12 cases in 2006, Robertson County had the fewest DUI cases compared to any other county. Jefferson County had the most DUI cases with a total of 4,741 cases in 2006.
- The percent of all DUI cases resulting in a conviction has remained stable over the five year period between 2002 and 2006.
- In 2006, 68% of all DUI cases resulted in a conviction. However, when broken down by offense, the rate of conviction decreased with each subsequent DUI offense. For example, in 2006, 70% of individuals charged with their first DUI offense were convicted while just 27% of individuals charged their 4<sup>th</sup> DUI were convicted.

## Sex Offenses

- The number of forcible rapes rose 3.3% between 2004 and 2006.
- The rate of forcible rape in Kentucky was lower than the national rate in 2004, 2005, and 2006.
- In 2006, Illinois, Ohio, and Tennessee had higher rates of forcible rape than Kentucky while Indiana, Missouri, Virginia, and West Virginia had lower rates of forcible rape.
- The total number of rape, sodomy, and sexual abuse cases all declined between 2005 and 2006.
- Of all sex offense cases, cases involving sexual abuse had the highest percentage of cases resulting in conviction.
- In 2006, 80.5% of rape offenders, 61.7% of sexual abuse offenders, and 90.0% of sodomy offenders were sentenced to prison, life, or 25 years without the possibility of parole.
- The average sentence for all sex offenses fell between 2005 and 2006.
- The total number of sex offenders newly committed to the Department of Corrections decreased from 538 offenders in 2005 to 454 offenders in 2006.
- The number of sex offenders serving out their sentence more than doubled between 2004 and 2006.
- The number of new commitments for sexual abuse was higher than the number of new commitments for any other sex offense during the five year period from 2002 through 2006.

## School Safety

When House Bill 330 was passed in the 1998 General Assembly, an opportunity emerged for Kentucky to employ research driven strategies to maintain a safe and secure learning environment for all children. The Kentucky Center for School Safety (KCSS) was established to provide data analysis, research, and technical assistance, and to disseminate information on successful strategies to ensure school safety. KCSS is a collaborative partnership between a contract agency, Eastern Kentucky University, and three partner agencies, the University of Kentucky, Murray State University, and the Kentucky School Boards Association. For the 2005-2006 school year, KCSS published its seventh annual report on school safety. The report confirmed that many of the efforts to reduce school crime had indeed been successful. The following is a summary of the findings as they pertain to law violations and consequences in Kentucky schools:

- Of Kentucky's total 2005-2006 public school population (633,241 students), 7.63% of students committed an offense that resulted in suspension, corporal punishment, or expulsion (with or without services).
- The total number of disciplinary actions for Part I law violations in the 2005-2006 school year decreased 74% from the number reported in the 2002-2003 school year.
- The total number of disciplinary actions for Part II law violations in the 2005-2006 school year decreased 31% from the number reported in the 2002-2003 school year.
- Compared to the 2003-2004 school year, the number of reported law violations decreased for each Part I offense except for robbery and burglary in the 2005-2006 school year.
- Assaults and drug abuse violations account for the largest number of Part II law violations.
- In the three year period between the 2003-2004 school year and the 2005-2006 school year, the most significant decreases in Part I offenses were for aggravated assault, larceny-theft, and arson.
- Region 3, Jefferson County, had the highest rate of disciplinary actions for law violations with a rate of 1.42 disciplinary actions per 100 students. Region 2, Southwest, had the lowest rate with .44 disciplinary actions per 100 students.
- For Part I and II law violations, out of school suspensions decreased 18% in the three year period between the 2003-2004 and 2005-2006 school years. During this same period, expulsion without services decreased 23% and expulsion with services decreased 30%.
- The total number of disciplinary actions for incidents involving handguns and weapons other than handguns decreased 26% between the 2003-2004 and 2005-2006 school years.

## Section XII: Key Criminal Justice Cost Information

While monitoring changes in crime trends, it is also important to track the range of costs associated with incarceration, community supervision, and criminal justice programs for adults and juveniles.

Since national research has indicated that community-based programs provide effective and cost-efficient alternatives to detention and incarceration for selected offenders, these factors should be routinely considered in the allocation of limited criminal justice resources and the development of statewide criminal justice policy.

It is also important to note that while meta-analysis of research studies provide support for the position that treatment works and that punishment is ineffective or counter-effective unless combined with training and reinforcement for positive skills and behaviors, it is also clear that one size does not fit all and programs must be matched to the needs and abilities of the offender.

This section includes data on state criminal justice budgets, police employment trends, incarceration costs, substance abuse programming costs, and grant funding.

- In FY 2006, Kentucky's criminal justice enacted budgets totaled \$1,007,906,100.00.
- The cost per inmate per day in Kentucky's correctional institutions varies by level of security, from \$32.53 (Marion Adjustment Center) to \$69.13 (Kentucky State Reformatory).
- According to the Department for Juvenile Justice, in FY 2006, the total annual costs for juvenile institutions, including detention centers, youth development centers, and group homes, was \$52,547,137.00.
- In FY 2006, the Department of Corrections spent \$43,523,782.38 on medical expenditures.
- In FY 2006, \$59,327,547.76 was spent on substance abuse programming by state agencies.

Justice and Public Safety Cabinet.

## Grants Management

KRS 15A.150 authorizes the Grants Management Branch, Justice and Public Safety Cabinet, to receive and award federal funds obtained from the U.S. Department of Justice. Federal funds are awarded to state agencies, local units of government, and private, nonprofit organizations based on three broad types of grants: Formula, Block, and Discretionary. Formula grants are based on specific criteria determined by the granting agency (e.g., the Edward Byrne Memorial Grant Program awards money based on a state's population and criminal justice expenditures). Block grants are federal allocations provided to states for a specific purpose, with relatively broad guidelines for allocation. Discretionary grants are those used for special purposes (e.g., funding of the Statistical Analysis Center). Among the major grant programs administered by the Grants Management Branch are the following:

- **Edward Byrne Memorial State and Local Law Enforcement Assistance Block Grants (LLEBG)**  
The Byrne program is a federal formula grant program which awards monies to states based on a formula consisting of a base amount of .25 percent of the total allocation plus Kentucky's relative share based on population. Funds are available from 28 program areas and are used to create safer communities and improved criminal justice systems. State and local criminal justice system agencies are eligible to apply. The Byrne and LLEBG grant programs were replaced by Justice Assistance Grants in 2005; limited residual Byrne grant funds remain for award.
- **Edward Byrne Memorial Justice Assistance Grants (JAG)**  
Funds are awarded to the Commonwealth and certain qualifying local jurisdictions based on population and the number of Uniform Crime Report (UCR) Part I violent crimes reported to the Federal Bureau of Investigation (FBI). These federal funds may be used to provide funding to state agencies and local units of government, and private not-for-profit organizations, for the implementation of law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The JAG program replaced Byrne and LLEBG grants in 2005.
- **Law Enforcement Service Fee Fund**  
This program is fully funded by the Commonwealth of Kentucky, with revenue derived from a fee assessed on persons convicted of driving under the influence. Funds are used for DUI related purposes (e.g., blood alcohol testing and equipment, DUI education).
- **Victims of Crime Act (VOCA)**  
VOCA is a federal formula grant program allocated according to population. Funds are provided to units of local government and non-profits to provide direct services to crime victims. Funds are typically used to support victim advocate positions. Any private, nonprofit agency providing direct services to victims of crime is eligible.
- **Violence Against Women Act (VAWA)**  
VAWA is a federal formula grant program allocated according to population. Funds are generally provided for victim advocacy/services (30%), prosecution (25%), law enforcement (25%), discretionary (15%), and courts (5%). Eligible agencies/entities include victim service programs, law enforcement, prosecutors, and any program providing services to adult victims of domestic violence and sexual assault.

The remainder of this section presents information on grant awards by county, and includes data on the Alternatives to Incarceration grant program administered by the Kentucky Corrections Commission. For brief program descriptions of additional grants administered by the Grants Management Branch, see Appendix C.

# Appendix A: Description of Existing Criminal Justice Information Systems

## **CourtNet**

Allows easy and expeditious access to criminal and civil cases filed with the Kentucky Court System. Provides court case tracking, consolidates local court information systems (including KY Courts), and serves as the system for accessing statistical data.

## **eWarrants**

Web-based application that provides law enforcement real-time access to arrest warrant information. The system provides a mechanism to create paperless complaints that flow to the judge for review and signature into a warrant then to law enforcement for servicing. Project is currently in pilot with a planned state roll-out for late 2007.

## **JusticeXchange**

Web portal that provides law enforcement and other criminal justice officials instant access to information about offenders held in jails throughout the state and across the country. Based on data collected automatically from local jail management systems, JusticeXchange provides near real-time current and historical information about incarcerated offenders, including biographical information, charges, photographs, and behavioral reports, all accessible through a secure website. Vendor: Appriss.

## **Juvenile Offender Records Information (JORI)**

Case management system that tracks juvenile offenders through the criminal justice system. Includes offenders' demographic information, charges, work history, education, and treatment. JORI is a Visual Studio .NET application.

## **Kentucky Inmate Management System (KIMS)**

Provides for the management of the day-to-day activity of inmates at the institutional level.

## **Kentucky Offender Management System (KOMS)**

The KOMS Project directly supports the Governor's program of Legacy Systems modernization and Technology Consolidation. It will replace the three main offender databases which are approximately 27 years old and difficult to maintain and retrieve valuable inmate data. The three applications (ORION, KIMS and PPCMS) although essentially stable (in terms of the security of data entered), are at varying stages of their expected life cycles. The following table provides a timeline for the implementation of the KOMS project tasks.

<b>Project Task</b>	<b>Start Date</b>	<b>End Date</b>
Phase I: Conduct Project Planning	9/6/2005	11/21/2005
Phase IIa: Prepare for Transition	9/6/2005	10/31/2006
Phase IIb: Implement Inmate Management (replace ORION)	1/19/2006	1/29/2007
Phase IIc: Implement P&P Field Services (replace PPCMS/PIN)	11/22/2005	10/30/2006
Phase IId: Implement Institution Management (KIMS/STG)	7/3/2006	4/19/2007

### Kentucky State Police

Core systems described utilize various vendor proprietary technology, in addition to SQL, ORACLE, VB, and FILENET.

- **Automated Fingerprint Identification System (AFIS)**  
Statewide system of Livescan devices in each county detention center, state prison facilities, juvenile detention centers and commercial drivers license-HazMat testing sites, tied into centralized AFIS system. Provides for the capture, storage, and search of fingerprint information, and transmission to FBI-IAFIS system. Vendor: Motorola.
- **Computer Aided Dispatch (CAD)**  
Utilized by 17 KSP Posts/HQ Dispatch Centers to provide call tracking, emergency medical dispatch, call response, etc., in addition to providing required GIS mapping of land line and mobile callers. Vendor: Interact.
- **Computerized Criminal History System (CCH)**  
State criminal history repository for fingerprint supported arrests and supporting participation in Triple I. Includes utilization of XML rapsheet. Vendor: SAIC.
- **Kentucky's Open Portal Solution (KYOPS)**  
Serves as the statewide law enforcement system for the electronic/hard copy capture, quality control, transmission, storage and retrieval of the following law enforcement report types: traffic collision, crime, uniform citation, courtesy warning, call response, and field information reports which are fed directly to the state's Intelligence Fusion Center. Features of the electronic reporting component include real time submission of reports, GPS coordinates collection, both integrated crime scene and collision investigation diagramming software and all modules support the utilization of 2D bar code scanners for importing drivers license data. The system also features a statewide Master Name Index and Master Location Index, utilizing all mentioned data sources. Access to submitted records is provided through a secure web portal, with various "canned" reports available for statistical analysis of crime and collision data, as well as the ability to do custom inquiries across the various data sources for crime/collision analysis, planning and resource allocation. Historical Crime mapping and Collision mapping are also accessible through the web portal. Vendor: IDMS.
- **KyWINS Messenger**  
Open source Instant Messaging solution customized for usage by public safety personnel operating on wireless mobile data system. Provides uniform data/IM interoperability to public safety personnel, across boundaries, agencies and disciplines, free of charge. Also allows communication back to PC based personnel in traditional wired settings. Currently being piloted with 100+ users in 4-5 different counties, from police officers to fire/EMS personnel to the state Office of Homeland Security. Expected roll out statewide in 2007. Vendor: Jabber-Jive Software.
- **Law Enforcement Information Network of Kentucky (LINK)**  
Serves as the primary law enforcement communications network providing access to NCIC and NLETS. Also houses all state "hot" files, to include EPO/DVO, wanted, missing persons, sex offenders, etc. Vendor: CPI.
- **Mobile Data Computer System (MDCS)**  
Statewide system which encompasses over 125 tower sites and base stations all networked to three integrated Internet Protocol Network Controllers, providing seamless Mobile Data access to all law enforcement agencies in the state, with no ongoing monthly charge for airtime usage. This access allows agencies to access both state level (LINK) and federal (NCI) data from their cars, in addition to providing silent dispatch, AVL other features, and instant messaging, depending upon the software utilized by the agency. Agencies utilizing the state standard mobile client software, BIO-key, may utilize the state provided shared mobile message switch, thereby eliminating the need to purchase their own, and giving them access to all agencies/users, utilizing the same platform. Vendor: IP MobileNet & BIO-key.

## Sourcebook of Criminal Justice Statistics in the Commonwealth

---

- **Sex Offender Registry (SOR)**

Serves as the state repository of registered sex offender information, including public access website, listing all registered offenders. Linked to the National Public Sex Offender registry system. Vendor: CPI.

### **KY Courts**

County specific stand-alone electronic case management system that tracks all information related to court cases.

### **Offender Records Information and Operations Network (ORION)**

Tracks inmate records and status once the inmate is sentenced and incarcerated. Links to the Kentucky Offender Online Lookup system (KOOL).

### **Probation and Parole Case Management System (PPCMS)**

Web based application that tracks the activities and requirements of released inmates.

### **Victim Information and Network Everyday (VINE)**

The automated notification system that alerts victims about a change in the custody status of their offender. Internet browser front end, SQL server database. Vendor: Appriss.

## Appendix B: Part I and Part II Offenses

### Part I Offenses

**Murder:** Murder is the unlawful killing of a human being with malice aforethought. Justifiable homicides and traffic-related deaths are not included.

**Rape:** Rape is defined as the carnal knowledge of a person, forcible or otherwise, against the person's will. Only forcible rapes are included, together with assaults for the purpose of rape and attempted forcible rapes. Excluded are rapes where the victim is under the age of consent and no force is used.

**Aggravated Assault:** Assault is the unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. It is not necessary that injury result from an aggravated assault when a gun, knife, or other weapon is used which could, and probably would, result in serious personal injury. Therefore, all assault attempts where serious injury would have been likely to occur are included. Excluded from the Part I crime of aggravated assault is all assaults which do not include the use of a dangerous weapon and in which there was no serious or aggravated injury. These simple assaults are counted as Part II crimes.

**Burglary:** Burglary is unlawful entering or remaining in a building with the intent to commit a crime. This includes entries where force of any kind is used to gain entrance, entries where no force was used (an unlocked door or by concealment), and attempts to enter forcibly (even though entry was not actually gained).

**Larceny:** Larceny, or larceny-theft, is the unlawful taking of property or articles of value without the use of force, violence or fraudulent conversion. Included are such offenses as pocket picking, purse snatching (where little or no force is used), shoplifting, thefts from autos, thefts of auto parts and accessories, bicycle thefts, and thefts from buildings when the perpetrator entered legally. Con games, forgeries and bad checks, embezzlement, and obtaining money under false pretenses are not included under the category of larceny.

**Auto Theft:** Auto theft includes all thefts and attempted thefts of motor vehicles. The taking of a vehicle for temporary use when prior authority has been granted would not be classified as auto theft.

**Arson:** Arson includes any willful or malicious burning or attempt to burn (with or without intent to defraud) a residence, public building, motor vehicle or aircraft, personal property of another, etc. Only fires determined to have been willfully or maliciously set are classified as arson.

## Part II Offenses

Part II Offenses consist of all other offenses, with the exception of traffic violations. They generally include the following:

- Manslaughter by Negligence
- Other Assaults
- Arson
- Forgery and Counterfeiting
- Fraud
- Embezzlement
- Stolen Property: Buying, Receiving, Possession
- Vandalism
- Weapons: Carrying, Possession
- Prostitution and Commercialized Vice
- Sex Offenses
- Narcotic Drug Laws
- Gambling
- Offenses Against Family
- Driving Under the Influence
- Liquor Laws
- Drunkenness
- Disorderly Conduct
- All Other Offenses (except traffic)
- Curfew and Loitering Laws
- Runaways

## Appendix C: Additional Grant Program Descriptions

### **Bulletproof Vest Partnership Grant Program**

This federal program assists states and local units of government in equipping their law enforcement officers with armored vests. A match of up to 50% is required, and the Chief Executive Officer of each jurisdiction must coordinate the vest needs among all its law enforcement agencies.

### **National Criminal History Improvement Program**

State agencies designated by the Governor (in this case, the Kentucky Justice and Public Safety Cabinet), can apply for funding to enhance criminal history records. Allowable uses include costs associated with database automation, interfacing with the National Incident-Based Reporting System (NIBRS), equipment, training, and research. A 20% match is required.

### **Residential Substance Abuse Treatment Program**

This program is designed to assist states and local governments in developing and implementing residential substance abuse treatment programs in correctional facilities. A 25% match is required. The program also requires urinalysis or other drug testing of participating prisoners, separation from the general correctional population, and is required to last between six and twelve months.

### **State Justice Statistics Program for Statistical Analysis Centers (SACs)**

State agencies authorized with responsibility for the state's Statistical Analysis Center can apply. In Kentucky, the SAC is a component of the Justice and Public Safety Cabinet. No match is required. Funds can be used for the establishment and operation of a SAC.

### **Violent Offender Incarceration/Truth in Sentencing Program**

State and local governments can apply to this program which serves to ensure that violent offenders, including juveniles, serve a substantial portion of their sentence. A 10% cash match is required. Grant funds can be used to build or expand correctional facilities, for violent offenders, for juvenile boot camps, and for jail facilities and privatized facilities. These funds cannot be used for the operation or expansion of programs.

### **Paul Coverdell Forensic Science Improvement Grant Program**

Coverdell funds are available to state and local governments to improve the quality and timeliness of forensic science and medical examiner services and/or to eliminate backlogs in the analysis of forensic evidence, including controlled substances firearms examination, forensic pathology, latent prints, questioned documents, toxicology, and trace evidence.

### **Rural Domestic Violence and Child Victimization Enforcement Grant Program**

The primary purpose of the rural program is to enhance the safety of victims of domestic violence, dating violence, and child victimization by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. The agency administering the program is required to collaborate with a faith- and/or community- based non-profit serving victims of domestic violence, dating violence or child victimization.
